# CEO Greetings

---

The global economy, especially the IT industry, is changing rapidly day by day, and blockchain and AI technologies are at the center of it. expected to become mainstream. Following the wave of IT companies such as Amazon, Google, Microsoft, and Apple The world is changing at an unprecedented rate.

In particular, a new world is unfolding and a market is being formed due to blockchain, AI, metaverse, and big data at home and abroad. However, besides large corporations, small and medium-sized enterprises (SMEs) in Korea do not conduct investment research smoothly.

**Digicode** is a company that has grown steadily based on challenges and trust. We are continuously investing in research on new trends and technological developments. As new technologies emerge, the **Digicode** team challenges, bumps, and successfully solves them. It is the only specialized company in Korea that is developing.

**Digicode** will position itself as a leader in the cutting-edge technology industry as a future Total Solution Provider. We will become a company that fosters the best experts based on the capabilities of core personnel and realizes a better IT world. And we will become a successful partner based on source technology through experts.

thank you.

**CEO Piyush Dakhara**
